

CWS INDUSTRIES (MFG) CORP.

# ROLLOUT BUCKETS

## Increase Dump Heights!

CWS Rollout Buckets are designed specifically for each machine application and the open design allows for easy loading of materials. The modular design allows CWS' engineers to custom-design buckets with widths and capacities to suit your application.

Rollout Buckets are ideal for high capacity applications with high-dump heights. Each bucket is supplied with a universal bolt-on cutting edge and have industrial high-pressure cylinders combine induction-hardened double chrome-plated rods.

### FEATURES:

- Lip, sidebars and skid shoes made from T1-400 (AR plate)
- Bucket roll and side-plates 44W (44,000-psi yield)
- Frame is made from both T1-100 and 44W
- Over-sized induction-hardened chrome pins complete with through-hardened greasable bushings at all hinge points
- ORB hydraulic fittings will not work loose or leak
- Line bored for reliable operations and longer working life
