Engineering Capabilities

By listening to the needs of our global customers, our highly experienced engineering teams design innovative and application-specific products. CWS uses tools such as [AutoCAD](#), [Inventor](#), [Solidworks](#), [Ansys](#), & [IGES file exchange](#) to transform concepts into solid models, working drawings, and product designs that are often subject to structural testing using Finite Element Analysis (FEA). CWS builds products that are precision engineered for the highest level of safety, reliability, and durability.

Manufacturing Capabilities

CWS Canadian factories are located in Surrey, British Columbia and Edmonton, Alberta. CWS is a division of the IES family of companies which have an additional 16 factories located in North and South America. Our Canadian factories' manufacturing capabilities include: flame cutting, high definition plasma cutting, rolling, forming, turning, machining, welding, hydraulic cylinder manufacturing, assembly, and painting. Our Canadian factories produce a wide variety of products and product families which are outlined on our website www.cwsindustries.com.

Paladin's Western Canada Distributor

CWS offers exclusive Paladin Light and Heavy Attachments for a selection of economical and efficient work saving products in the construction, landscaping, agricultural, snow removal, vegetation management, and building and grounds industries. CWS carries a wide range of attachments and parts for Bradco, CP, CustomWorks, FFC, Harley, JRB, McMillen, and Sweepster products.

About IES

The IES family employs more than 2,800 people and operates 18 manufacturing facilities throughout North America and other parts of the world. Customers include major OEMs, national rental and retail fleet companies and hundreds of OEM-aligned and independent dealers serving a wide range of global markets.
